To Whom it May Concern:

Following an extensive evaluation process Hall County chose Precision Planning, Inc. to provide architectural consulting services for our new Public Safety and Fire Administration Building. Their extensive experience in the design of municipal facilities including public safety complexes, fire stations, law enforcement facilities, city halls and courthouses more than satisfied the needs of Hall County. The project presented challenges as it incorporates Administrative Offices for the Public Safety Director, Fire Administration Headquarters, the Emergency Operations Center, the Code Enforcement Division, Reception and the 911/Communications Center. Precision Planning was selected and was charged with a variety of tasks, including but not limited to, the development of a building program, site selection, conceptual plan, project schedule and budget estimates. From inception they have performed in a professional and diligent manner responding to our needs without hesitation.

The project team of Liz Hudson, Project Architect; Jennifer Franklin, Project Architect; and Lance Davis, Associate, worked very closely with Hall County's Project Team delivering a product and services above expectations. Precision Planning, Inc. continues to work with Hall County on this project as we move into the construction management phase. Their highly qualified and professional staff would be an immediate asset to any project.

It is without hesitation that I recommend Precision Planning, Inc. for any multi-disciplined planning, engineering, architectural or surveying project.

Please contact me directly if you would like to discuss this further.

Sincerely,

A handwritten signature in black ink, appearing to read "DERRER", is written over a horizontal line.
