Re: Reference for Precision Planning, Inc.

To Whom it May Concern,

I have completed the attached survey form in regards to the Jackson County Law Enforcement Project. Unfortunately, such surveys rarely allow me to go into depth necessary to describe the level of my satisfaction with a company such as Precision.

I have been working with Precision Planning for over 18 months in the design and construction of the Oconee County Jail and 911 Center.

I have found that Precision Planning has strived to meet my needs, as the end user of the facility, in each and every decision that has been made in planning the facility.

Obviously working within the limits of my budget, Precision has allowed me to have free reign in the design phase, they have been open to all my ideas, suggestions, comments etc, and they don't make a design decision without consulting me first.

What more can a client such as myself reasonably expect from an architect?

Not only would I rehire Precision Planning, I would recommend them without reservation or hesitation on ANY project. As far as a jail construction project is concerned, I would recommend them to the exclusion of all others.

I am a hard client to please. Precision Planning has gone above and beyond my needs, and I am satisfied they would do just as good a job for Jackson County.

Respectfully submitted

Scott R. Berry
